

FREE Technical Seminar

Wed 18th October 2006, 12:00 to 2:30 pm

Waterproofing at or Below Ground Level: Design Considerations & Guidance

Objective

The objective of this free lunchtime Technical Seminar is to help to give those attending a better knowledge and understanding of the more common problems associated with waterproofing today's structures and how to avoid them.

The seminar is of a highly technical nature, and will be followed by a Question & Answer session. Individual surgery sessions will also be available on request with RIW's technical experts, for specific one-to-one project-related consultations.

Agenda

12:00 - 12:30 Registration

Buffet lunch served

12:30 - 13:15 Presentation:

Waterproofing at or Below Ground Level - Design Considerations & Guidance

An introduction to BS8102 (Code of Practice for the protection of structures against water from the ground) outlining the critical design considerations that influence the form of construction and material selection.

This will include guidance on the most commonly used waterproofing materials, including reference to strengths and weaknesses of the systems, together with application methods and advice on surface preparation.

13:15 - 13:30 Question & Answer session

13:30 - 14:30 Drop-in surgery session

Register Now!

- FREE lunchtime seminar presented by RIW Waterproofing Technical Experts
- Bring along your project questions and drawings for consultation with our team
- Delegates may book to attend all or part of this seminar - please use the attached registration form
