

General Notes & Guidance:

This drawing must be read in conjunction with the latest RIW Product Literature.

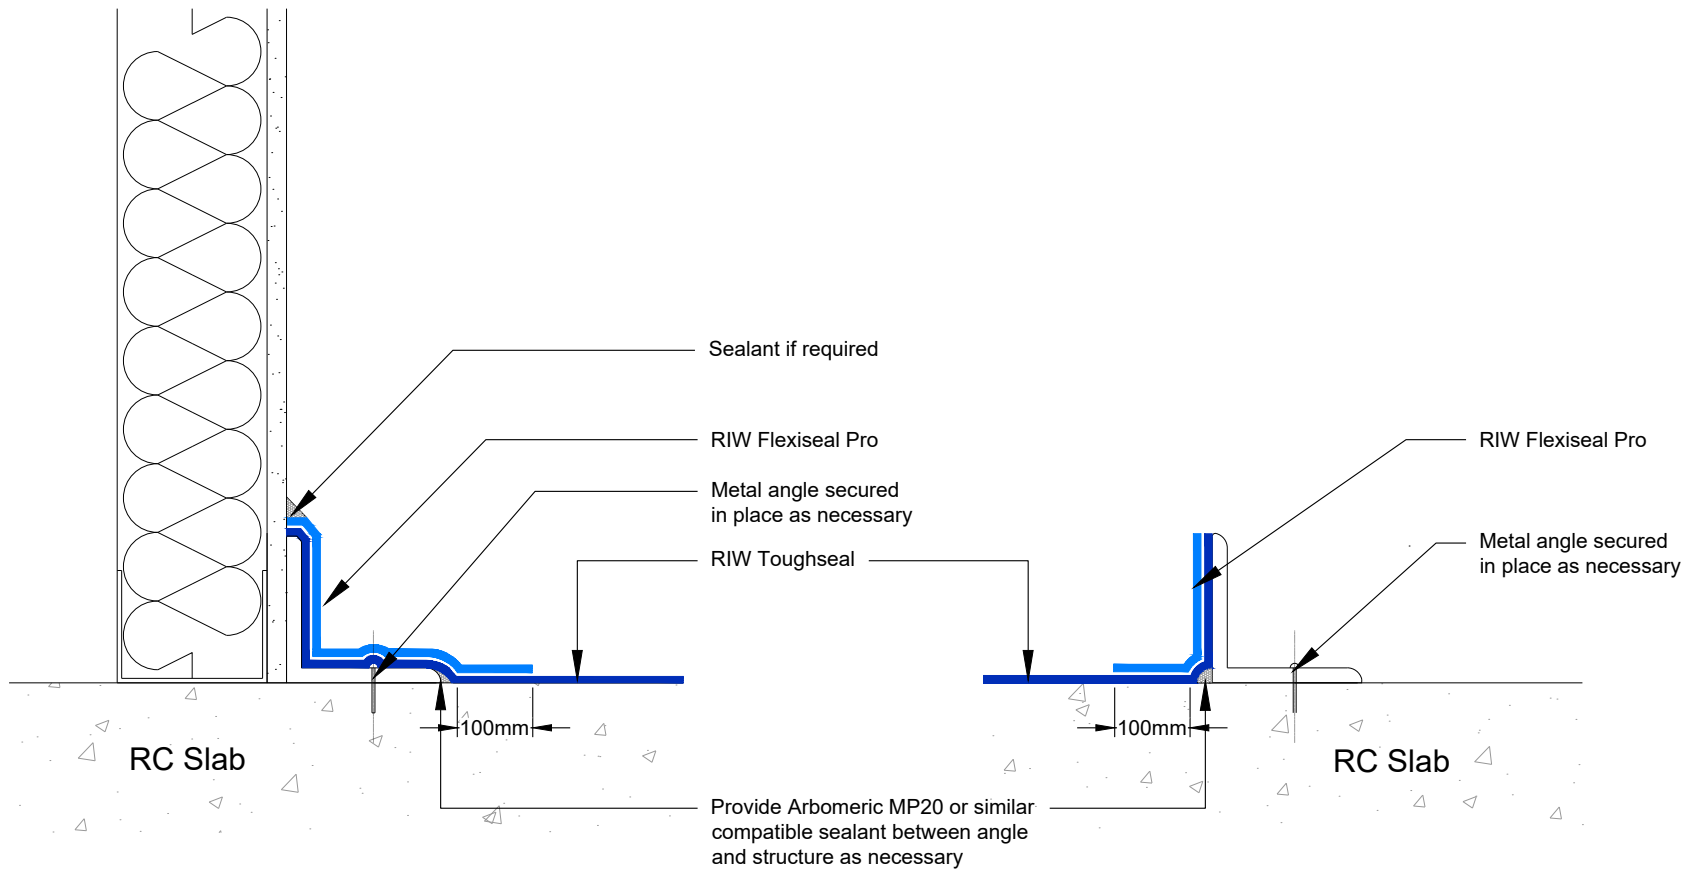

All waterproofing details shown herein must receive approval from the design team or appointed designer before implementation on site, these waterproofing details may have other impacts on the structure and these impacts must be assessed and understood by the design team or appointed designer.

BS8102:2009

6.2.4 The need for continuity in the waterproofing protection should also be considered when selecting a type of protection. In most circumstances, the protection should be continuous.

Drawing Notes:

1. Partition wall must be capable of resisting any hydrostatic pressure coming to bear against it.
2. If galvanised metal angles are to be used, these must be pre-treated with a mordant solution.
