

- Notes:
1. RIW Structureseal is used to provide Type A (barrier) protection to the outside of below ground reinforced concrete structures.
 2. RIW Cavity Drain R20 is used to provide Type C (drained) protection to the inside of below ground structures.
 3. The products may be used separately as required, or together when combined protection is necessary.

**MOVEMENT JOINT; RIW CAVITY DRAIN R20 / RIW STRUCTURESEAL:
