

Notes:

1. Provide access points as necessary that allow routine maintenance of channels.
2. Outlets should be provided where necessary. If required, see also RIW Ltd's range of sumps and pumps, etc.
3. Ideally RIW Aqua Channel should be placed in a recessed channel within the depth of the floor slab.
4. RIW Cavity Drain R7 is indicated vertically. However RIW Cavity Drain R20 may be used if preferred/required.
